

The Depositit service offers huge benefits, including:-

Secure

- * Comprehensive off-site data backup eliminates the risk of critical data loss due to viruses, fire, flood or theft.
- * Automatic scheduling minimizes user intervention ensuring data is always protected.
- * Latest encryption technology endorsed by the US Government ensures ultimate data protection and privacy (no one but you has access to the data).
- * Data stored in 3 separate and independent maximum-security off-site facilities enables Depositit to provide complete peace of mind.

Resourceful

- * Advanced data compression reduces bandwidth requirements, on-line transfer times and the amount of data you can store.
- * Incremental backups, incorporating Delta Block technology saves time & costs by transferring only new or revised files.
- * Multiple backup set capability allows users to schedule, backup & store unlimited data sets.
- * Software application is easily installed on either PC's, laptops or servers.
- * Saves data from mobile phones, pda's and any other devices synced to your machine.
- * Unlimited storage capacity with full scalability to accommodate any growth requirements.
- * Automatic monitoring of system status, routine reporting & confirmation of all operational tasks.

Cost Effective

- * Reduce IT and personnel overheads & minimize unnecessary hardware costs & staff involvement.
- * One straightforward single payment, ensures you never have to worry about data loss again
